

# User Stories

- **Register for an account:**

- The registration process should include fields for the user to input their username, email address, and password.
- Upon successful registration, the user should receive a confirmation email to verify their account.
- Now, the user should be able to log in to their account.

- **Log in securely:**

- Users should be able to log in using their registered email address and password.
- The login process should be secure.

- **Browse different categories of stories:**

- The website should have a clear navigation menu or interface for users to explore different categories of stories.
- Categories could include genres like fiction, non-fiction, mystery, romance, etc., or they could be based on themes or topics.

- **Search for stories based on keywords or topics:**

- Users should have the ability to search for stories using a search bar.
- The search functionality should return relevant results based on the keywords or topics entered by the user.

- **Read the full content of a story:**

- When a user clicks on the title or thumbnail of a story, they should be taken to a dedicated page where they can read the full content.
- The content should be displayed in a user-friendly format, with options for text resizing, font selection, and readability features.

- **Upload own stories:**

- Registered users should have the ability to upload their own stories to the platform.
- The upload process should include fields for the user to enter the title, description, category, and content of their story.
- Users should also be able to upload an optional cover image for their story.

- **Edit or delete uploaded stories:**

- Users should be able to edit or delete stories they have uploaded.
- Editing capabilities should include the ability to modify the title, description, category, content, and cover image of the story.

- **Like or favorite stories:**

- Users should have the option to like or favorite stories to save them for later.
- Liked or favorite stories should be accessible from the user's profile or a dedicated section of the website.

- **Leave comments on stories:**

- Users should be able to leave comments on stories to share their thoughts, feedback, or reactions.
- Comments should be displayed alongside the story content, allowing for interaction and engagement.
